Treatment options

	<p>SPEECH THERAPY SESSIONS</p> <p>The client must first participate in an evaluation, and, if they qualify for services, a frequency is recommended (1x/week, 3x/week, etc) along with an amount of time for each visit (ex. 30min, 60min). Once the evaluation is completed and a treatment plan with goals is developed, speech therapy sessions will begin with essential data collection every visit to determine maximum efficiency of strategies and to track progress over time.</p>
